

# IMAGE CAPTURE

**NOVAPACS  
SYSTEM INCLUDES:**

View Station

Tech Workstation

Web Viewer

Archive Manager

## NovaCapture

Using frame grab technology, NovaCapture takes images from non-DICOM modalities, puts them in a DICOM header and sends them to the PACS. There is no more affordable way to include the non-DICOM modalities in the PACS.

### NovaCapture features

- Works on any modality except X-Ray
- Images are stored in the PACS and can be queried and retrieved
- Allowance for full-user control
- Multiple re-crop and database query
- LCD monitor and small box have a small footprint
- Foot pedal that allows for hands-free use
- Quick image captures, save, and send
- 8-bit or 12-bit capture
- Multiple user-defined resolutions
- Twain compliant
- Auto preview
- Contrast / brightness controls

### Why Choose NovaPACS?

Enterprise level, scalable, complete, fast, and effective, NovaPACS is everything you need in a PACS. It's also an easy way to go from film to digital, send and manage images over the hospital network and the web, and provide for all your radiology and hospital imaging needs. What's more, NovaPACS is remarkably affordable and financing can be tailored to fit your hospital or imaging center requirements.
